

POWERED BY NEXORA AI

Infocom X — Powered by NEXORA AI. Built for the Future of Business.

Intelligent Business Management with NEXORA AI

By connecting deeply with your business data, **Infocom X, powered by NEXORA AI**, continuously identifies trends, detects anomalies early, and delivers actionable insights.

Automate routine decisions, streamline workflows, and empower your teams with intelligent AI-driven operations. **Infocom X** transforms real-time business data into smarter actions—helping you improve efficiency, control costs, and achieve sustainable growth.

KEY FEATURES

- **VUI-Based Business Control** — Manage business operations using natural voice and conversational commands.
- **Conversational & Predictive AI** — Get intelligent answers, anticipate trends, and receive actionable recommendations.
- **Dedicated Customer & Vendor Portals** — Enable seamless collaboration, document sharing, order tracking, and real-time communication.
- **Banking Integration & Payments** — Connect banking processes and simplify payment management.
- **Simple, Fast & Intuitive UI** — Easy-to-use screens designed for faster processing with fewer steps.
- **Powered by NEXORA AI** — Intelligent automation and decision support built into your everyday business operations

Nexora AI Agents

SALES AGENT

Helps sales teams identify opportunities, prioritise leads and improve follow-ups.

FINANCE AGENT

Assists with financial analysis, receivables, payables, cash flow and management reporting.

PROCUREMENT AGENT

Monitors purchasing requirements, vendor activity and procurement exceptions.

INVENTORY AGENT

Tracks stock levels, movements, shortages and replenishment requirements.

CRM AGENT

Analyses customer activity, engagement and sales opportunities.

RISK SENTINEL

Highlights unusual transactions, exceptions and potential business risks.

AUDIT AGENT

Supports audit preparation, transaction review and compliance monitoring.

Infocom X- ERP connects your Finance, Sales, CRM, Procurement, Inventory, Projects, Manufacturing, HCM, , and Reporting on a single intelligent platform.

AI-FIRST ARCHITECTURE

Not an AI feature added to legacy software. Every module — AP, AR, GL, reporting — was built with AI at the core from day one.

AI GOVERNANCE MODES

Control how much autonomy AI has within your organisation.

01 — MANUAL

AI provides information and recommendations.

Users make the final decision.

02 — ASSISTED

AI prepares actions for users to review and approve.

03 — SEMI-AUTONOMOUS

AI executes approved workflows based on defined business rules.

04 — FULLY AUTONOMOUS

AI can execute predefined processes automatically within approved governance limits.

Your business. Your rules. Your control.

Powered by Nexora AI

Your ERP. Your Business Intelligence. Your AI Assistant.

NEXORA AI works across your ERP environment to provide intelligent assistance and business insights.

AI Business Assistant

Ask questions in natural language and receive business answers without navigating through multiple screens.

Example:

"Which customers have overdue invoices above S\$50,000?"

"Show me this month's sales compared with last month."

"Which products are running low in stock?"
